

OPEN TRENCH WORK APPLICATION USE CASE

ABOUT SUPER CORFLO®

Super Corflo is a premier dual-walled, continuous coil electrical conduit product family. With an innovative dual-walled design that provides a lightweight and effortless installation experience, coupled with enhanced crush-resistance and a semi-smooth inner wall to facilitate smooth cable pulling.

Super Corflo products are extensively utilized in a diverse range of electrical infrastructure projects, including utility work, home construction, telecom, fibre optic Networks, EV charging systems solar farms and retail fueling stations.

In this Scenario, the contractor used 4” Super Corflo for an open trench work application terminating at a duck bank . The total install was 1000ft (5 rolls) of product.
